2. Digital transformation in education

Develop platforms supporting remote learning and teaching, thoroughly apply digital technology to management, teaching and learning activities; digitalize materials and textbooks; establish platforms for direct and online sharing of teaching and learning resources. Develop educational technologies in the direction of individualized training.

100% of educational institutions shall launch remote learning and teaching activities, in which, at least 20% of the curriculum shall be taught online experimentally. Apply digital technology to give homework and check students' preparation before coming to class.
